(LISTED BELOW)

SUPPLEMENT TO
REPORT NO. 25X1X

1. Two 20 x 130 x 330-foot red brick buildings, under construction at the WARSAW-OKECIE(R 53/P 98) airfield since March 1949, were nearly completed by early October 1949. The buildings, having two adjacent rows of windows, were presumably to serve as storehouses.
2. a. Twelve four-engine aircraft of Soviet make which seldom took off, have been stationed at the field since early September 1949.

Description: In-line engines set under the wings and far to the fore, double rudder assembly, three-bladed propeller.

b. About 80 fighters and 50 twin-engine Dakotas of US make were also parked there.

3. Soviet and Polish air units were stationed at the field.

25X1A

Comment:

a. The accuracy of this report is doubted since the presence of four-engine aircraft had not been confirmed by other sources and Soviet four-engine aircraft with double rudder assembly are not known. It is also conspicuous that source does not mention the utilization of the airfield as a central airfield by the Polish LOT Airlines.

b. According to previous reports by other sources, an air technical school and a Polish air transport regiment are assumed to be stationed in WARSAW-OKECIE.
